Author Index (Vol. 13)

Abernethy, J.L., *see* Lee, Y.-S., 203
Aranowski, J., *see* Dougherty, P.M., 331

Baba, H., S. Sato, T. Inuzuka, M. Nishizawa, M. Tanaka and T. Miyatake (Characterization of the antigenic determinant on HSB-2 cells shared with myelin-associated glycoprotein (MAG) using monoclonal antibodies), 89
Band, H. and G.P. Talwar (Effect of macrophage activators on the phagocytosis of mycobacteria by Schwann cells), 109
Barabe, J., *see* Germain, L., 135
Baverstock, J., *see* Pollard, J.D., 123
Behan, W.M.H. (Immunocytochemistry — Book review), 349
Bigner, D.D., *see* Lee, Y.-S., 183, 203
Boyd, J.E., *see* Simpson, J., 1
Brady, R.O., *see* Johnson, D., 99
Brostoff, S.W. and T.M. White (Treatment of clinical experimental allergic encephalomyelitis in the rat with monoclonal antibodies), 233
Buschman, E., N. van Oers, M. Katz and R.A. Murgita (Experimental myasthenia gravis induced in mice by passive transfer of human myasthenic immunoglobulin — Evidence for an ameliorating effect by alpha-fetoprotein), 315

Christie, J.E., *see* Simpson, J., 1
Conti, A., *see* Maestroni, G.J.M., 19
Cuello, A.C., *see* Semenenko, F.M., 243

Dafny, N., *see* Dougherty, P.M., 331
Day, E.D., G.A. Hashim, D.J. Ireland and N.T. Potter (Heteroclitic antibodies in Fischer 344 rats to a synthetic encephalitogenic myelin basic protein peptide), 61
Day, E.D., G.A. Hashim, D.J. Ireland and N.T. Potter (Polyclonal antibodies to the encephalitogenic neighborhoods of myelin basic protein: singular affinity populations neutralized by specific synthetic peptide probes), 143
Dougherty, P.M., J. Aronowski, D. Drath and N. Dafny (Evidence of neuro-immunologic interactions: cyclosporine modifies opiate withdrawal by effects on the brain and immune components), 331
Drath, D., *see* Dougherty, P.M., 331

Fallis, R.J., *see* Johnson, D., 99
Fink, G., *see* Simpson, J., 1

Galeano, C., *see* Germain, L., 135
Gatenby, P.A., *see* Pollard, J.D., 123
Germain, L., J. Barabe and C. Galeano (Blood levels of kinins in experimental allergic encephalomyelitis), 135
Gordon, A., *see* Simpson, J., 1
Guseo, A. (Rapid determination of CSF lymphocyte subsets by labeled microspheres), 117

Haahr, S., *see* Møller-Larsen, A., 273
Hafler, D.A., *see* Johnson, D., 99
Hammann, K.P. and H.C. Hopf (Determination of interferon-γ in the peripheral blood of multiple sclerosis patients in remission, using a chemiluminescence technique), 9
Hansen, H.J., *see* Møller-Larsen, A., 273
Hashim, G.A., *see* Day, E.D., 61, 143
Hopf, H.C., *see* Hammann, K.P., 9

Inuzuka, T., *see* Baba, H., 89
Ireland, D.J., *see* Day, E.D., 61, 143
Irie, H., *see* Ota, K., 283

James, K., *see* Simpson, J., 1
Johnson, D., D.A. Hafler, R.J. Fallis, M.B. Lees, R.O. Brady, R.H. Quarles and H.L. Weiner (Cell-mediated immunity to myelin-associated glycoprotein, proteolipid protein, and myelin basic protein in multiple sclerosis), 99

Katz, M., *see* Buschman, E., 315
Kennedy, P.G.E. (Viral Encephalitis: Pathology, Diagnosis and Management — Book review), 115

Subject Index (Vol. 13)

Acetylcholine
–, receptor; autoimmunity; myasthenia gravis; T cells, 75
Adjuvant
–, astrocytes; Ia induction; coronavirus, 259
Adoptive transfer
–, cyclosporine; neuroimmunologic axis; morphine; opiate withdrawal, 331
Affinity population
–, polyclonal antibodies; myelin basic protein; encephalitogens; peptide probes, 143
Allergic encephalitogenic peptide
–, multiple sclerosis; cell-mediated cytotoxicity; human, 273
Alpha-fetoprotein
–, experimental myasthenia gravis; human myasthenic immunoglobulin; mice, 315
Alzheimer disease
–, Epstein-Barr virus; virus-transformed lymphocytes; autoantibodies; brain-reactive antibodies; immunohistochemical staining; temporal cortex; senile plaques; neurofibrillary tangles; clonal selection theory, 1
Anaphylatoxin
–, immune complex; complement; $F(ab')_2$; C3; catechol; CNS; hypothalamus; rat, 293
Antibody production
–, corticosterone antagonism; melatonin; pharmacologic pinealectomy; pineal gland, 19
Anti-CD4 antibody
–, anti-I-A antibody; experimental allergic encephalomyelitis; Lewis rat, 233
Antigen
–, astrocytoma; avian sarcoma virus; high pressure liquid chromatography, 203
–, intracellular; monoclonal antibody; glia, 243
Anti-I-A antibody
–, anti-CD4 antibody; experimental allergic encephalomyelitis; Lewis rat, 233
Astrocyte
–, Ia induction; coronavirus; adjuvants, 259
Astrocytoma
–, antigen; avian sarcoma virus; high pressure liquid chromatography, 203
–, avian sarcoma virus; cell surface radioimmunoassay; monoclonal antibody, 183
Autoantibody
–, BN rats; encephalitogen; Fischer 344 rats; heteroclitic antibodies; Lewis rats; myelin basic protein peptides; synthetic peptides, 61
–, Epstein-Barr virus; virus-transformed lymphocytes; brain-reactive antibodies; immunohistochemical staining; temporal cortex; Alzheimer disease; senile plaques; neurofibrillary tangles; clonal selection theory, 1
Autoimmunity
–, acetylcholine receptor; myasthenia gravis; T cells, 75
Avian sarcoma virus
–, antigen astrocytoma; high pressure liquid chromatography, 203
–, astrocytoma; cell surface radioimmunoassay; monoclonal antibody, 183

Bradykinin
–, experimental allergic encephalomyelitis; kallikrein-kinin system; histopathology, 135
Brain-reactive antibody
–, Epstein-Barr virus; virus-transformed lymphocytes; autoantibodies; immunohistochemical staining; temporal cortex; Alzheimer disease; senile plaques; neurofibrillary tangles; clonal selection theory, 1
Bulk isolation
–, cell culture; flow cytometry; fluorescence-activated cell sorter; galactocerebroside; HNK-1; immunocytochemistry; oligodendrocytes, 47

C3
–, immune complex; complement; $F(ab')_2$; anaphylatoxin; catechol; CNS; hypothalamus; rat, 293
Catechol
–, immune complex; complement; $F(ab')_2$; C3; anaphylatoxin; CNS; hypothalamus; rat, 293
$CD4^+$ T cell
–, experimental allergic encephalomyelitis; monoclonal antibody; helper/inducer T cells; immunoregulation; Lewis rat, 217
Cell culture
–, bulk isolation; flow cytometry; fluorescence-

activated cell sorter; galactocerebroside; HNK-1; immunocytochemistry; oligodendrocytes, 47

Cell sorter
–, fluorescence-activated; bulk isolation; cell culture; flow cytometry; galactocerebroside; HNK-1; immunocytochemistry; oligodendrocytes, 47

Cell surface radioimmunoassay
–, astrocytoma; avian sarcoma virus; monoclonal antibody, 183

Central nervous system
–, immune complex; complement; $F(ab')_2$; C3; anaphylatoxin; catechol; hypothalamus; rat, 293

Chemiluminescence
–, measurement; multiple sclerosis; remission; interferon-γ, 9

Clonal selection theory
–, Epstein-Barr virus; virus-transformed lymphocytes; autoantibodies; brain-reactive antibodies; immunohistochemical staining; temporal cortex; Alzheimer disease; senile plaques; neurofibrillary tangles, 1

Complement
–, immune complex; $F(ab')_2$; C3; anaphylatoxin; catechol; CNS; hypothalamus; rat, 293

Coronavirus
–, astrocytes; Ia induction; adjuvants, 259

Corticosterone
–, antagonism; antibody production; melatonin; pharmacologic pinealectomy; pineal gland, 19

Cyclosporin
–, adoptive transfer; neuroimmunologic axis; morphine; opiate withdrawal, 331
–, demyelination; immunosuppression; multiple sclerosis; Theiler's virus, 159

Cytotoxicity
–, cell-mediated; multiple sclerosis; allergic encephalitogenic peptide; human, 273

Demyelination
–, cyclosporin; immunosuppression; multiple sclerosis; Theiler's virus, 159

Encephalitogen
–, autoantibodies; BN rats; Fischer 344 rats; heteroclitic antibodies; Lewis rats; myelin basic protein peptides; synthetic peptides, 61
–, polyclonal antibodies; myelin basic protein; peptide probes; affinity populations, 143

Epstein-Barr virus
–, virus-transformed lymphocytes; autoantibodies; brain-reactive antibodies; immunohistochemical staining; temporal cortex; Alzheimer disease; senile plaques; neurofibrillary tangles; clonal selection theory, 1

Experimental allergic encephalomyelitis
–, anti-I-A antibody; anti-CD4 antibody; Lewis rat, 233
–, bradykinin; kallikrein-kinin system; histopathology, 135
–, immunosuppression; lymph nodes; mitoxantrone; relapsing disease; therapy, 175
–, monoclonal antibody; helper/inducer T cells; $CD4^+$ T cells; immunoregulation; Lewis rat, 217

Experimental allergic neuritis
–, T cell subsets; Ia-positive cells; monoclonal antibodies, 283

Experimental myasthenia gravis
–, human myasthenic immunoglobulin; alpha-fetoprotein; mice, 315

$F(ab')_2$
–, immune complex; complement; C3; anaphylatoxin; catechol; CNS; hypothalamus; rat, 293

Flow cytometry
–, bulk isolation; cell culture; fluorescence-activated cell sorter; galactocerebroside; HNK-1; immunocytochemistry; oligodendrocytes, 47

Fluorescence-activated cell sorter
–, bulk isolation; cell culture; flow cytometry; galactocerebroside; HNK-1; immunocytochemistry; oligodendrocytes, 47

Galactocerebroside
–, bulk isolation; cell culture; flow cytometry; fluorescence-activated cell sorter; HNK-1; immunocytochemistry; oligodendrocytes, 47

Glia
–, monoclonal antibody; intracellular antigen, 243

Glioblastoma
–, human; in vitro growth; leukoregulin, 31

Helper/inducer T cell
–, experimental allergic encephalomyelitis; monoclonal antibody; $CD4^+$ T cells; immunoregulation; Lewis rat, 217

Heteroclitic antibody
–, autoantibodies; BN rats; encephalitogen; Fischer 344 rats; Lewis rats; myelin basic protein peptides; synthetic peptides, 61

High pressure liquid chromatography
–, antigen astrocytoma; avian sarcoma virus, 203
HNK-1
–, bulk isolation; cell culture; flow cytometry; fluorescence-activated cell sorter; galactocerebroside; immunocytochemistry; oligodendrocytes, 47
Hypothalamus
–, immune complex; complement; $F(ab')_2$; C3; anaphylatoxin; catechol; CNS; rat, 293

Ia antigen expression
–, inflammatory demyelinating polyneuropathy; T lymphocyte subsets, 123
Ia induction
–, astrocytes; coronavirus; adjuvants, 259
Ia-positive cell
–, experimental allergic neuritis; T cell subsets; monoclonal antibodies, 283
IgG
–, humoral immune response; Theiler's virus demyelinating disease; isoelectric focusing overlay study; multiple sclerosis, 305
Immune complex
–, complement; $F(ab')_2$; C3; anaphylatoxin; catechol; CNS; hypothalamus; rat, 293
Immune response
–, humoral; Theiler's virus demyelinating disease; isoelectric focusing overlay study; multiple sclerosis; IgG, 305
Immunity
–, cell-mediated; myelin-associated glycoprotein; proteolipid protein; myelin basic protein; multiple sclerosis, 99
Immunocytochemistry
–, book review, 349
–, bulk isolation; cell culture; flow cytometry; fluorescence-activated cell sorter; galactocerebroside; HNK-1; oligodendrocytes, 47
Immunohistochemical staining
–, Epstein-Barr virus; virus-transformed lymphocytes; autoantibodies; brain-reactive antibodies; temporal cortex; Alzheimer disease; senile plaques; neurofibrillary tangles; clonal selection theory, 1
Immunoregulation
–, experimental allergic encephalomyelitis; monoclonal antibody; helper/inducer T cells; $CD4^+$ T cells; Lewis rat, 217
Immunosuppression
–, cyclosporin; demyelination; multiple sclerosis; Theiler's virus, 159
–, experimental allergic encephalomyelitis; lymph nodes; mitoxantrone; relapsing disease; therapy, 175
Inflammatory demyelinating polyneuropathy
–, Ia antigen expression; T lymphocyte subsets, 123
Interferon-γ
–, multiple sclerosis; remission; chemiluminescence measurement, 9
Isoelectric focusing
–, overlay study; humoral immune response; Theiler's virus demyelinating disease; multiple sclerosis; IgG, 305

Kallikrein-kinin system
–, bradykinin; experimental allergic encephalomyelitis; histopathology, 135

Leukemia cell line
–, myelin-associated glycoprotein; natural killer cells; monoclonal antibodies, 89
Leukoregulin
–, human glioblastoma; in vitro growth, 31
Lymph node
–, experimental allergic encephalomyelitis; immunosuppression; mitoxantrone; relapsing disease; therapy, 175
Lymphocyte
–, CSF; monoclonal antibody-labeled microspheres; Quantigen T4/T8; Quantigen T/B; light and scanning electron microscopy, 117
Lymphokine
–, Schwann cells; phagocytosis; macrophage activators; mycobacteria, 109

Macrophage activator
–, Schwann cells; phagocytosis; lymphokines; mycobacteria, 109
Melatonin
–, antibody production; corticosterone antagonism; pharmacologic pinealectomy; pineal gland, 19
Microsphere
–, monoclonal antibody-labeled; CSF lymphocytes; Quantigen T4/T8; Quantigen T/B; light and scanning electron microscopy, 117
Mitoxantrone
–, experimental allergic encephalomyelitis; immunosuppression; lymph nodes; relapsing disease; therapy, 175
Monoclonal antibody
–, astrocytoma; avian sarcoma virus; cell surface radioimmunoassay, 183
–, experimental allergic encephalomyelitis; hel-

per/inducer T cells; $CD4^+$ T cells; immunoregulation; Lewis rat, 217
–, experimental allergic neuritis; T cell subsets; Ia-positive cells, 283
–, glia; intracellular antigen, 243
–, labeled microspheres; CSF lymphocytes; Quantigen T4/T8; Quantigen T/B; light and scanning electron microscopy, 117
–, myelin-associated glycoprotein; leukemia cell line; natural killer cell, 89

Morphine
–, cyclosporine; adoptive transfer; neuroimmunologic axis; opiate withdrawal, 331

Multiple sclerosis
–, cell-mediated cytotoxicity; allergic encephalitogenic peptide; human, 273
–, cell-mediated immunity; myelin-associated glycoprotein; proteolipid protein; myelin basic protein, 99
–, cyclosporin; demyelination; immunosuppression; Theiler's virus, 159
–, humoral immune response; Theiler's virus demyelinating disease; isoelectric focusing overlay study; IgG, 305
–, remission; interferon-γ; chemiluminescence measurement, 9

Myasthenia gravis
–, acetylcholine receptor; autoimmunity; T cells, 75

Myasthenic immunoglobulin
–, human; experimental myasthenia gravis; alpha-fetoprotein; mice, 315

Mycobacteria
–, Schwann cells; phagocytosis; lymphokines; macrophage activators, 109

Myelin-associated glycoprotein
–, cell-mediated immunity; proteolipid protein; myelin basic protein; multiple sclerosis, 99
–, leukemia cell line; natural killer cell; monoclonal antibodies, 89

Myelin basic protein
–, cell-mediated immunity; myelin-associated glycoprotein; proteolipid protein; multiple sclerosis, 99
–, peptides; autoantibodies; BN rats; encephalitogen; Fischer 344 rats; heteroclitic antibodies; Lewis rats; synthetic peptides, 61
–, polyclonal antibodies; encephalitogens; peptide probes; affinity populations, 143

Natural killer cell
–, myelin-associated glycoprotein; leukemia cell line; monoclonal antibodies, 89

Neurofibrillary tangle
–, Epstein-Barr virus; virus-transformed lymphocytes; autoantibodies; brain-reactive antibodies; immunohistochemical staining; temporal cortex; Alzheimer disease; senile plaques; clonal selection theory, 1

Neuroimmunologic axis
–, cyclosporine; adoptive transfer; morphine; opiate withdrawal, 331

Neuroimmunology
–, Second International Congress; announcement, 116

Neuroimmunomodulation
–, Second International Workshop; report, 343

Oligodendrocyte
–, bulk isolation; cell culture; flow cytometry; fluorescence-activated cell sorter; galactocerebroside; HNK-1; immunocytochemistry, 47

Opiate withdrawal
–, cyclosporine; adoptive transfer; neuroimmunologic axis; morphine, 331

Peptide probe
–, polyclonal antibodies; myelin basic protein; encephalitogens; affinity populations, 143

Phagocytosis
–, Schwann cells; lymphokines; macrophage activators; mycobacteria, 109

Pharmacologic pinealectomy
–, antibody production; corticosterone antagonism; melatonin; pineal gland, 19

Pineal gland
–, antibody production; corticosterone antagonism; melatonin; pharmacologic pinealectomy, 19

Plaque
–, senile; Epstein-Barr virus; virus-transformed lymphocytes; autoantibodies; brain-reactive antibodies; immunohistochemical staining; temporal cortex; Alzheimer disease; neurofibrillary tangles; clonal selection theory, 1

Polyclonal antibody
–, myelin basic protein; encephalitogens; peptide probes; affinity populations, 143

Proteolipid protein
–, cell-mediated immunity; myelin-associated glycoprotein; myelin basic protein; multiple sclerosis, 99

Quantigen
–, T4/T8; T/B, CSF lymphocytes; monoclonal antibody-labeled microspheres; light and scanning electron microscopy, 117

Receptor
–, acetylcholine; autoimmunity; myasthenia gravis; T cells, 75

Schwann cell
–, phagocytosis; lymphokines; macrophage activators; mycobacteria, 109
Synthetic peptide
–, autoantibodies, BN rats; encephalitogen; Fischer 344 rats; heteroclitic antibodies; Lewis rats; myelin basic protein peptides, 61

T cell
–, acetylcholine receptor; autoimmunity; myasthenia gravis, 75
–, experimental allergic encephalomyelitis; monoclonal antibody; helper/inducer T cells; $CD4^+$ T cells; immunoregulation; Lewis rat, 217
–, subsets; experimental allergic neuritis; Ia-positive cells; monoclonal antibodies, 283
Temporal cortex
–, Epstein-Barr virus; virus-transformed lymphocytes; autoantibodies; brain-reactive antibodies; immunohistochemical staining; Alzheimer disease; senile plaques; neurofibrillary tangles; clonal selection theory, 1
Theiler's virus
–, cyclosporin; demyelination; immunosuppression; multiple sclerosis, 159
–, demyelinating disease; humoral immune response; isoelectric focusing overlay study; multiple sclerosis; IgG, 305
T lymphocyte subset
–, Ia antigen expression; inflammatory demyelinating polyneuropathy, 123

Viral encephalitis
–, pathology; diagnosis; management; book review, 114
Virus-transformed lymphocyte
–, Epstein-Barr virus; autoantibodies; brain-reactive antibodies; immunohistochemical staining; temporal cortex; Alzheimer disease; senile plaques; neurofibrillary tangles; clonal selection theory, 1
